Sir,

In continuation of my letter No. 1175/9-24 dated the 25th August 1924, I have the honor to submit the following detailed report as to the manner of escape from the Mysore Jail of convict No. 3075 by name Chenna on the night of the 23rd August 1924.

2. The prisoner had been confined in a separate cell No. 4 - just that evening pending enquiry into a case of assault by him of a fellow prisoner. The enquiries pertaining to the escape go to show that the convict should have got away between midnight and 2 A.M. The Superintendent puts forward the following hypothesis as to the mode of escape. The prisoner first of all prised the door of the cell off its hinges, having wedged in a brick, scaled the wall of the latrine situated a few yards off and, by this means, got access to the terraced roof of the inner circle of buildings. But for a segment of a bare high wall abutting the work sheds in the outer enclosure, this roof runs practically continuously throughout the length of the entire inner circle. The surmise of the Superintendent is that having reached the roof the prisoner should have jumped down to the outer enclosure - at the place of the lowest

drop on the side of the garden. The fact of the absence of foot prints is brushed aside for the reason that the rain should have obliterated them although there were visible marks in other places on the same night and over the same grounds! A very significant circumstance was that there were no scratches or dents of chipped mortar on the outermost wall, which would certainly have been caused when the man must have steadied himself for a jump-down of at least ten feet.

But the most formidable objection against the acceptance of the correctness of the Superintendent's conjecture is provided by the absence of marks of any description on the wall of the latrine which the prisoner is supposed to have scaled over immediately on effecting his escape from the cell. There were no marks on the wall or depressions in it that might have aided the prisoner to rest his foot in the act of scaling the wall. Further, the sloping roof of the latrine is thickly set with pieces of fragile glass, not one which is dislodged or broken.

Another suggestion which I heard made was that having somehow got on to the roof, the prisoner availed himself of the electric pole newly installed behind the female hospital building, to gain the outer enclosure. It happens that this particular pole is closer to the wall than the other and, standing on the roof, it might be possible - taking a slight awing of the body - to grip the pole and slide down to the ground. This suggestion is untenable firstly because the prisoner would be in imminent danger of detection by the guards stationed close by near the gate and secondly because he is not likely to waste valuable time in traversing a long stretch of roof to reach this spot.

3. It is, however, the account of his final exit from the Jail premises that most presents incredible features. Assuming that he scaled the outermost wall with the help of the ladder it is inconceivable how, <u>unaided</u> and standing or

perhaps sitting astride the pointed end of the high wall, he could have kept his balance in the endeavour to pull up the ladder. It is even more improbable that he could set the ladder on the other side without visible traces either on th wall or on the ground - of the severe effort involved in the act. There are marks of the ladder having been kept for climbing but on other side of the wall ~~no marks~~ no marks were found although the ground was soft. The ladder itself was hidden in a bush about half a furlong from the Jail. I cannot realise that an escaping prisoner would take all this trouble to hide the ladder after he once gets safely outside the precincts. His one idea will be put as much space betwe himself and the Jail as possible. Every moment is precious to him. Besides, the road on the western side of the Jail is a busy thoroughfare and carts and pedestrains will be passing up and down at a very early hour .

4. I visited the Jail and after a thonough and detailed examination weighed all the probabilities one against another. The operations of the convict, commencing with the lifting off of the door of the cell and covering a wide range of subsequent activity such as scaling and jumping down walls, breaking into two rooms in succession and removing a long and heavy ladder through the narrow, barred aperture of a window, must have occupied sufficient time and caused sufficient disturbance to wake up the ~~x~~ fastest sleeper.

My firm conviction is that the prisoner must have escaped from the inner to the outer enclosure through the front or the back gate - more likely the latter. The key of this gate and the inner of the two gates in front was in the custody of the head warder (the rest of the keys being kept under seal.) I am constrained to think that the escape could not have occurred without his connivance or at least without gross carelessness on his part. Warder Mancha who was on duty at that hour is also equally culpable. Even excluding the likelihood of actual ~~connivance~~ - connivance from consideration, it is certain that had they

been but normally alert the escape would not have been possible.

5. At my inspection I found that the door of No. 4 cell occupied by the prisoner had been split lengthwise near the hasp so as the portion on the other side resting on the hinges could easily be lifted off. The doors of the other cells could not be so dislodged from the hinges. It seems to me that the door plank must have been broken at the time of escape and the Jail authorities must have failed to notice this till 6 A.M. the next morning. Evidently this is the noice which the prisoners heard in the other barracks (please vide statement enclosed.)

6. In these circumstances I hold warder Mancha and Head Warder Kencha both responsible for the escape of the prisoner. They will accordingly be dismissed from the service.

Both of them are Holeyars and, as Jail servants, persons belonging to this community have been the worest to deal with. This is not a prejudicial view but an experience gathered from close contact with their work as Superintendent of the Jail. They are unscrupulous to a degree and capable of the grossest misdeeds. Bringing in snuff, beedi and all other prohibited articles used to be a delight to them. Personally, I consider that the less this community is represented in the Jail service, the better it would be in the interests of safety and discipline in the Jail.

7. I also agree with the Superintendent as to the failure on the part of the warders Dyava and Chouri to be on patrol after one O'clock although they were specially deputed for this work that night. As already noted it must have taken at least an hour for the prisoner to have effected his escape and if the patrol had been kept he should easily have been caught. These warders will also be dismissed from the service.

8. As to the precautions for the future, - the doors of

ıe cells should be improved. It is desirable also to have ıe electric poles judiciously re-set, although the safest 'rangement would be to lead the wires underground.

9. I must also note that inspections of guards during ghts by the Jailer and the Deputy Jailer leave much to be :sired. During the whole month of August 1924, the inspec-ons by the former are said to have numbered eight and the me of inspection, - 11 P.M. is mentioned only in one case, ıen he accompanied the Superintendent on the occasion the monthly nocturnal round by the latter! Evidently ıe other so called inspections by the Jailer were all done an early hour probably at 8 P.M. This is most unsatis-ctory. Much of this laxity in procedure arises, I fear 'om the loose wording of rules 148 and 157 of the Jail .nual. The rules should be amended. I enclose a draft ıendment for the consideration and orders of Government.

A copy of the Superintendent's report together with the closures thereto, is herewith submitted.

I have the honor to be,

Sir,

Your most obedient servant,

PROPOSED AMENDMENT OF RULES 148 AND 157 OF THE JAIL MANUAL.

-@-@-@-@-@-@-

Rule	As it stands at present	Proposed to be amended as.
148	He shall supervise the working of the warder guard. At least once a week at uncertain times he shall visit the Jail after 8 P.M. and satisfy himself that the standing guard is present, the sentries posted and on the alert and that the rounds are properly maintained.	He shall supervise the working of the Warder Guard. Not less than twice a week, he shall visit the Jail at an uncertain hour between 8 P.M. and 6 A.M. and satisfy himself that the standing guard and the sentries are on duty and on the alert and that the rounds are properly maintained. The actual time of inspection as well as the irregularities noticed should invariably be mentioned in the Diaries. At least one such inspection in the week should be done at or after midnight.
157	The Deputy Jailor shall visit the guard at least once a week in the manner provided in Rule 148.	The Deputy Jailor shall visit the guard not less than twice a week in the manner provided in rule 148. He shall maintain a Diary in which the details of inspection and other matters that have a bearing on his duties shall be succinctly noted for the perusal and orders of the Superintendent.

Letter No. 565/- dated 3rd September 1924 from the Superintendent, Mysore Jail, Mysore, to the Inspector-General o: Prisons in Mysore, Bangalore.

-@-@-@-@-@-

In continuation of my previous report No.546/- dated 24th August 1924, re: the escape of convict No. 3075 Channa I have the honour to report as follows:-

1. Prisoner Channa escaped from this Jail on the night of 23-8-24 and this escape was noticed only the next morning. Four warders were sent immediately to search for him in certain suspected places, but the search proved fruitless. The matter was reported to the Police and the District Magistrate on the morning of 24-8-24. The Police have investigated the case, but the accused has not yet been traced.

2. There are 3 cells near the execution yard with wooden doors. Prisoner Channa for having assaulted convict Channabasav with a slipper was ordered by the Chief Jailor (pending my Order to be confined in one of these Jails. At lock-up time on the ev: of the 23rd Aug. prisoner Channa was accordingly confined in cel: No. 4.

I may be permitted to state here there was no occasion to suspect the insecurity of the doors of these cells, though the doors were somewhat old.

3. The manner of prisoner Channa's escape from the cell int he inner enclosure of the jail does not admit of any doubt. As already reported he has prised the door off its hinges wedging in rick and this is clear from the condition of the door on the mor: ng of the 24th idem. Similarly the manner of his escape from th: uter enclosure to the maidan outside the Jail is also very clear e has broken into the Store-Room through the roof by removing the .les and has removed a ladder from inside the Store-Room. He has milarly broken into the Weaving Shed and has removed a striped dsheet obviously to be used as clothing in place of his convict othing which was found thrown in the Jail garden. There are als: ear indications on the inside of the outer wall

near the northwestern corner of the Jail garden and these marks tally with the dimensions of the ladder found in the prickly-pear bush of the burial ground adjoining the Jail. These clearly show that finally effected his escape by scaling over the outer wall by the help of the ladder. These circumstances of the escape from the outer enclosure are so clearly correlated and the marks of foot prints, ladder prints etc., so clear that there can be little doubt as to how the prisoner escaped from the outer enclosure.

4. There are no clear indications to show as to how the prisoner escape from the inner enclosure to the outer one. In the yard in which he was confined in cell No. 4 there is a latrine with slooping roof connected to the big association ward quite apposite the Hospital. Though the roof was protected with broken glass pieces, it was not very thick at the margin for about a foot in length. The wall of the latrine has a small window which is conveniently within reach of another window in the wall of the above association ward. A prisoner actually climed to the top of the inner wall of the inner enclosure ove the roof of this latrine and the possibility of climbing to the top of this inner wall was thus actually demonstrated. Once a man is up that wall he can come round by walking over the terrace to a spot in the out wall of the inner enclosure from which there is only a drop of about 10 feet between his feet and the ground on the garden side of the outer enclosure. Enquiries since made by me show that prisoner Channa is a good climber of walls and that most of the several thievings enterprices were in scaling over walls and carrying away big vessels etc. The deta of the manner of escape set forth above indicate clearly that the prison must have carefully studied the detailes of the locality for a chance of escape sufficiently well before hand. The possibility of escape over t roof of the latrine, the expert wall climbing habits of the man concerne as well as the premeditated study of the locality, lead me to the conclusion that the prisoner escaped over the roof of the latrine and jumpe down at the place of lowest drop. The absence of foot prints on the inne wall cannot argue anything against this conclusion as there was some rain that night.

one of the men on duty on that night of having connived at the man's escape. My enquiries also show that the man who escaped has little or no means to offer any temptation to any of the men on duty. But all the same, the derelication of duty on the part of the Guard that night lies in not exercising sufficient vigilance in the night watch.

From the statements given by the convicts (statements Nos.7, 8 and 9) I also come to the conclusion that the escape most probably has occurred between 1 and 2 A.M. from the inside enclosu The above convicts have said in their statements that they heard s noise after twelve.

6. Taking all the above circumstances into consideration, I come to the conclusion that the men who might have prevented the escape of channa, if they had done their duty properly are:-

1. Warder who was on duty in the inner enclosure between 12 and 2, i.e., Mancha.

2. The patrol night guard of the outer enclosure i.e., Dyava and Chowri.

3. The night guard Officer i.e., Kencha.

In this connection I recommend the following punishments :-

1. Dyava and Chowri have failed to do their duty as per their own statements vide statements Nos: 5 & 6. The prisoner must have taken a considerable time to make all the preparations before he escaped from this outer enclosure. Certainly there was a chance of preventing the escape if they had gone on patrol after one. Therefore I told these as primarily responsible for the escape. The deserve dismissal. Pending orders I have kept them under suspension

2. Mancha. says that he did his duty properly. All the same prisoner has escaped during his turn. This shows lack of vigilance. Considering his conduct and good service of 23 years, I recommend him to be degraded from 1st to 2nd grade.

3. Kencha has failed to see that the patrol Guard did the duty properly. Has put in 33 years service. I therefore recommend him to be retired.

4. Towkal and Solaman were also on night duty.

They

hey say they did their duty properly, but they have failed o see whether the prisoner was in the cell or not. Their onduct is very good. For this negligence of duty I recommer hey might be fined Rs. 10/- each.

The statements of the Chief Jailor and the Chief Ward re also herewith submitted.

Statement of warder Fowkal 27/8/24

I am working in this jail nearly for the last 20 & 22 years. On the night of 23rd August 24. Warders Maneka & Solaman & Myself were deputed to guard prisoners and the warder Venkiah was deputed above us.

My 1st turn was from 8 to 10 PM and turn from 10 to 4 A.M.

In my 1st turn when I relieved Maneka I satisfied myself by seeing that the doors & the locks of all the cells including the one in which Ex Rama was confined were all correct. I spoke with Rama who was inside the cell and also with the prisoner who was confined in the adjacent cell but he was sleeping. Then I was walking about all over the yard till 10 o'clock. At 10 o'clock warder Solaman relieved me & then went & slept in the guard room. Again at 2 PM I went on duty & relieved Maneka

Rama was in the cell when I went there as usual I saw the door and the lock of the cell which were in fact as before I did not speak with Rama then. There was not any occasion for me and I was on guard duty till 4 and was relieved by Solaman there was electric light all the night. In the

In the night 23-8-24 ಬೆಳಿ ಸಂಜೆ ಹಿಂದಿನಿಂದಲೂ ನಾನೂ ನನ್ನ ಜೊತೆಯ

showers and myself were on patrol duty ಡ್ಯೂಟಿಗೆ ಹೋಗಿದ್ದೆವು. ರಾತ್ರಿ ಮಳೆ ಬಂದಿತ್ತು. ಇಬ್ಬರೂ 10 ಗಂಟೆಯಿಂದ

Both of us were patrolling on that night from 10 to 10.30pm & then we came to the front gate sentries & were sitting there till 12 midnight we went again at 12 midnight for patrol & returned to front gate at 12.30 & never went back again for patrol ಹೋಗಿದ್ದೆವು. 10½ ಗಂಟೆಗೆ ಎದ್ದು ಮತ್ತೆ ಗಸ್ತಿಗೆ ಹೋಗಿದ್ದೆವು

ಮತ್ತೆ ಮುಂಬಾಗಿಲ ಕಾವಲುಗಾರರ ಹತ್ತಿರ ಬಂದು ಕುಳಿತೆವು. ಮತ್ತೆ ರಾತ್ರಿ 12 ಗಂಟೆಯವರೆಗೂ ಅಲ್ಲಿಯೇ ಇದ್ದೆವು.

ಮತ್ತೆ 12 ಗಂಟೆಗೆ ಗಸ್ತಿಗೆ ಹೋಗಿದ್ದೆವು. 12½ ಗಂಟೆಗೆ ಮುಂಬಾಗಿಲಿಗೆ ಬಂದೆವು. ಮತ್ತೆ ಎಂದೂ ಗಸ್ತಿಗೆ ಹೋಗಲಿಲ್ಲ.

Drawing our patrol we went around inside the jail by compound wall and it was not possible for us to go to the inner side gate as it was locked we two only were allotted to the patrol duty during the whole night. It was known in the next morning that Rekha was affected by snake bite near the door of hostel

ಹಿಂಬಾಗಿಲಿಗೆ ಹೋಗಿದ್ದೆವು. ಅಲ್ಲಿಂದ ಜೈಲಿನ ಸುತ್ತಲಿನ ಕಾಂಪೌಂಡ್ ಗೋಡೆಯ ಒಳಗಡೆಯಿಂದ ಹೋಗಿದ್ದೆವು. ಆದರೆ ಒಳಗಿನ ಗೇಟಿಗೆ ಹೋಗಲು ಸಾಧ್ಯವಾಗಲಿಲ್ಲ. ಅದು ಬೀಗ ಹಾಕಿತ್ತು. ಆ ರಾತ್ರಿ ಪೂರ್ತಿ ಗಸ್ತಿಗೆ ನಾವಿಬ್ಬರೇ ಇದ್ದೆವು. ಮರುದಿನ ಬೆಳಿಗ್ಗೆ ರೇಖಾಳಿಗೆ ಹಾವು ಕಚ್ಚಿದೆ ಎಂದು ತಿಳಿಯಿತು.

I was sleeping on 23-8-24 in no: 3 ward I did not get up till 12-0 clock and was awake I was watching to see if anybody may give bedtea to prisoners on the night of 23-8-24. Prisoner Shamna who effected his escape was confined in no: 4 cell near the ward in which I was sleeping I heard a noise of the door from that side, it was nearly 10 or 11 o'clock at that time then I looked outside but did not understand from which door the noise came. Again after some time I saw some wonder standing near no: 3 cell I did not see from which side he came then it was drizzling The man who was standing near the cell had an oven coat on his head. It was like the one worn by jail warders. I did not know who the man was. I called out "who is that standing near the cell" but no reply was

Statement of Chief Jailer

In connection with the escape of Pr. 3075 - Chinna from the Keyers Ward on the night of the 23rd Augt. 1924 I beg to state as follows :-

For assaulting Pr. No. 2605 - Chinna Besanick with a chair on the evening of 23. 8. 24, at 6 P.M. in Odium prisoner No. 3075 - Chinna to be put in cells pending the disposal of the case.

At locking up time at about 6 P.M. the said prisoner removed Pr. No. 3207 Pattachari from the file in front of No. 2 Ward and sent him to cells for a period of 1 day pending disposal of the case. After the locking up of ward No. 11 & 2 I found Pr. No. 3207 Pattachari

marched and I went with and examined cell No. 3 the one next to the Christian Prayer Room.

When I went into No. 3 cell to examine it I saw No. 3078 Chemmaik was then standing in front of the next cell (i.e.) No. 4 cell.

When I came out of No. 3 cell after examining it, saw No. 3078 Chemmaik was not standing in front of No. 4 cell door.

I saw No. 3207 Pulthadan go with No. 3 cell and the door locked by Warden Kunchu.

I then walked up to the door of No. 4 cell and saw the Chief Warden Mr Pannaf, and Head warder Kunchi Nair standing along with No. 3078 Chemmaik, I spoke and checking the bars

of the next cell No. 5 cell I
stood approach to the
passage leading to the
gallows yard.
I saw Chief Warden Pownall
and Head Warden Kinsella
come out of No. 4 cell and
I saw the door locked by
Warden Kinsella. I then
went with the Gallows
enclosure and looked
around and saw that every
thing was correct.
On the completion of the
lock up when the table
was shut and the key
had been placed in the
hall almirah which was
locked & sealed, Head
Warden Kinsella gave parole
that 140 prisoners were locked
up and safe in his custody
and in addition to this
he has signed the lock up
book in token thereof.
I was only present morning
when in the act of unlocking
No. 4 cell Head Warden Kin-

found there was a gap between the door & its frame on the hinged side. As the door was almost flush with its frame it could not be seen if the prisoner was inside. So I forced it back and went in to the cell. It was empty. As the door had been lightly wedged with a piece of brick the force I used to go inside with, caused the door to crack. The prisoner Capp & his assembly were in the cell.

I searched the gallows yard & jail, the fenced area in the prison, the terrace of the jail the new civil prison.

In front of the new civil prison door some broken wooden bars on the ground and footprints in the sand, both upwards, were on the track leading down and on the right bank. I had the door unlocked and went inside. It was empty & no traces of anyone having entered it.

I got in the civil kitchen door and examined it and the adjoining Main Kitchen Yard. Footprints were visible.

I next examined the wooden shed to see if the escapees had left anything & there was a wooden stick. I found two tools,

I had the door unlocked and
searched inside for the missing
prisoner, but he was not there.
The ladder which was always
kept on this roof had been
taken out through the roof.
I at once searched around the
garden wall for it but it was not
to be seen. In the north-western
corner of the garden there were footpr
and marks of the ~~ladder~~ ladder having
been rested or placed on the ground. I
searched at once on the outside
of the garden wall. There were no
marks of the ladder having been
placed there. There was only an i-
regular mark as of a bull head
turned up the ground with its horns.
I searched the Mohammedan grave
yard, just over the road and in a
prickly pear bush along side an old mud wa
was found the ladder. It had been
tied by means of Coir hair two leather pie
of loom frame and one bamboo also
used on the loom. I picked up
Kenny over the same on the other
of the police. On returning with
police-man I found that the escaped
had also broken in the Weaver's sh
through the roof by removing 2 mangalo
tiles and that he had cut off a chequa
bedsheet from a small loom, which he m
have used as a covering as his small
cumbly was found at this loom and
his coat & trousers under a bush
in the garden.
I immediately sent out two Mus

Parker and referred the matter to the Superintendent. On the return of the Superintendent I conducted him over the entire premises again. So also on the arrival of the Police Commissioner, Deputy Chief as well as the Assistant Police Magistrate of the City. I have also consulted the Superintendent in regard to the matter.

The prisoner is a bright and intelligent looking boy, and has evidently had the advantage of the Common School system while in this City.

Respectfully

Statement of Mr. M. Ramaiah
Ch: Warder, Mysore Jail
2nd Sept: 1924

Sir,

In obedience to your verbal orders to furnish you in writing Statement in connection with the Escape of convict no: 3075 Channa who effected his Escape on the night of 23.8.24, I beg to submit the following:

On 23.8.24, I was present at lock-up & lock-up was done under the personal supervision of the Chief Jailor.

On 23.8.24, about 4 or 4.15 P.M. when I was in the office doing clerical duties, I came to know that the Chief Jailor had ordered to Confine in a cell Convict no: 3705 Channa as he had disobeyed Convict no: 2405 Channa Basava Prasad. I was in the office doing clerical duties till I went

ut out with the Chief Jailor to
lead to Lockup.

Before the prisoners are Locked up
all the prisoners are mustered in front
of their respective Ward & cells, Every
prisoner is Searched and their Wards
& cells are inspected. So was done
on 23.8.24.

When Ward no 2 was about to be
Locked up, the Chief Jailor ordered to
Confine in a cell the Convict Puttachan
for disobeying the Chief Jailor's order
in not wearing on his neck his neck
kerchief which he had tied to his waist
Cord. Then we both went in to Ward
~~When~~ no: 3. After we came out, I told
near the Ward to see to the counting
of prisoners just thereunto & the Chief
Jailor went in to the 3rd cell. Then
Puttachary was standing in front
of the 3rd cell & Convict ~~Ra~~ Chamu
in front of no 4th cell. Warder
Ramacha Locked the Cells.

After Lockup ~~of~~ of all the
prisoners was over the keys of all

all the wards & cells except those which were required to be ~~kept~~ left with the Head Warder, were secured in the wall almirah which I sealed with the jail seal in the presence of the Chief gailor & the Head warder Ramcha who was on duty. Total no: of prisoners locked & entrusted to the Hd warder Ramcha on that date was 140 which he has taken over charge in the lockup register.

The following day (24.8.24) I was present for duty at the jail at 6.10 Hrs. The warders at the main gate gave the parade that all was correct and so also the Head Warder Ramcha gave the parade that all was correct & that he did in the presence of all the Warders who were on duty in the inner enclosure I directed the warders to unlock the ward Warder Ramcha went to unlock the cells which are near the Execution yard. I was then standing near ward no: 6 Verifying the no: of prisoners unlocked in wards no: 6, 7 & 8. Then Ramcha came and reported to me" [illegible]

[illegible] I went to the cell. I found the lock in tact and the door being lifted off the hinges, but almost well closed. A brick was found forced underneath the door. Without unlocking, I examined the cell peeping through the perforated hole in the door; but the prisoner Channa was not found therein. Immediately I reported to the chief jailer, the fact of the Escape. ~~All the facts connected with~~ All the circumstances connected with the Escape noticed by me & the chief jailer were brought to the notice of the Supdt: at 8. A.m. when he visited the Jail

I beg to remain
Your most obedient Servant.
